ABOUT COMPANY

Dendion Logistics Services Limited is a dynamic, indigenous Nigerian company at the forefront of integrated security, technology, and construction solutions. Originally established as an engineering and logistics firm, Dendion has evolved into a multidisciplinary powerhouse delivering advanced infrastructure and bespoke security technologies to government agencies, oil and gas operators, and private sector clients across Nigeria.

Our Core Expertise

Security Technology Solutions We deploy cutting-edge surveillance and monitoring systems, including radar frequency tracking, drone-based reconnaissance, and custom-built digital security platforms tailored to high-risk environments. Our solutions are designed to safeguard critical assets, enhance situational awareness, and support national security objectives.

Engineering & Construction

From road networks and building construction to solar energy installations, Dendion delivers resilient infrastructure projects that meet global standards. Our engineering teams combine technical precision with local insight to execute projects efficiently and sustainably.

Logistics & Project Management

We provide end-to-end logistics support, manpower supply, and project management services, ensuring seamless execution across complex operational landscapes — especially in the upstream and downstream oil and gas sectors.

VISION

*To Be A
Leading Organisation,
Proffering Unique Solutions
For Our Clients Across
Our Chosen Market.*

MISSION

*To deliver innovative,
secure, and sustainable
solutions that empower our
clients, strengthen national
infrastructure, and drive
technological advancement
across Nigeria.*

CEO MESSAGE

At Dendion Logistics Services Limited, our journey has been one of transformation, innovation, and unwavering commitment to excellence. What began as a construction and engineering firm has evolved into a multi-sector leader in security technology, infrastructure development, and logistics services, proudly serving Nigeria's government institutions, oil and gas operators, and private enterprises.

Today, we stand at the intersection of technology and security, deploying advanced solutions such as radar frequency monitoring, drone surveillance, and bespoke digital platforms to protect critical assets and enhance operational intelligence. Our construction division continues to deliver high-impact projects from roads and buildings to solar energy installations with precision, sustainability, and community consciousness at its core.

Our success is built on a foundation of quality, safety, and integrity. Every project we undertake is guided by our "Goal Zero" philosophy; zero compromise on safety, zero tolerance for delays, and zero deviation from client expectations. We maintain rigorous supervisory control, foster a culture of accountability, and ensure our teams operate in clean, secure, and well-coordinated environments.

As CEO, I am proud of the strides we've made and the trust we've earned. But I am even more excited about the future. A future where technology empowers security, where infrastructure drives progress, and where Dendion continues to be a catalyst for national development.

Thank you for believing in our vision.

MANAGEMENT ORGANIZATIONAL CHART

OUR SERVICES

“
Our areas of specialization
include but not limited to
these following.

PIPELINE SURVEILLANCE & ASSET PROTECTION

Using advanced technologies like drone reconnaissance, radar frequency monitoring, and real-time data analytics, we safeguard critical pipeline infrastructure against vandalism, leaks, and unauthorized access, ensuring operational continuity and environmental safety.

SECURITY TECHNOLOGY SOLUTIONS

Dendion designs and deploys bespoke security systems, including AI-powered surveillance, remote monitoring platforms, and integrated threat detection tools. Our solutions are tailored for high-risk environments and government-grade protection.

CIVIL ENGINEERING & CONSTRUCTION

From roads and bridges to commercial buildings and residential developments, our civil engineering division executes infrastructure projects with precision, sustainability, and community impact in mind. We also specialize in solar energy installations and smart building integration.

UNARMED SECURITY SERVICES

We deliver professional, discreet, and reliable unarmed security personnel trained in surveillance, access control, and emergency response. Our teams are deployed across government installations, oil and gas facilities, and private enterprises to ensure safety and peace of mind.

OUR SERVICES

“
Our areas of specialization include but not limited to these following.”

MAN POWER SUPPLY

Dendion provides highly skilled, vetted, and security-conscious personnel for technical, administrative, and operational roles. Whether for short-term projects or long-term engagements, our workforce solutions are tailored to meet industry-specific demands.

GENERAL PROCUREMENT SERVICES

We source and deliver high-quality materials, equipment, and technology solutions across industries. Our procurement process is transparent, timely, and aligned with client specifications and budgetary goals.

PUBLIC/COMMUNITY RELATIONS

We manage both government, client and community interface on behalf of our client based on ethics and compliance.
